

RESTORE

Rust Converter &
Protective Coating

Restore stops further erosion and rusting of machinery, tools, vehicles, equipment, boats, metal buildings, and more. When painted on, Restore chemically converts rust into a black organic complex. A clear acrylic coating is formed. The coating is sufficient to last for years without painting, or it can be painted over using latex, oil based or epoxy paint. Extends life of anything made of metal.

DIRECTIONS: Shake well. Clean rusted surface of loose rust flakes with wire brush. Apply product at the rate of 300 to 500 sq. ft. per gallon. Apply by brushing, dipping, swabbing or spraying product evenly over rusted surface. May be applied using equipment designed to spray latex paint. If necessary, when spraying add up to 3 oz. of water per gallon. Allow to dry completely. A clear hard finish will form. Surface may be painted or left as is after drying. Do not store at 32°F or below.

MODO DE EMPLEO: Agite bien. Limpie la superficie oxidada con un cepillo para aflojar el óxido. Aplique el producto a una taza de 300 a 500 pies cuadrados por galón. Aplique por medio de una brocha, tirándolo, embarrándolo o rociando el producto de forma pareja sobre la superficie. Puede aplicarse usando el equipo designado para rociar pintura de látex. Si es necesario, cuando rocíe añada hasta 3 onzas de agua por galón. Permita que se seque completamente. Un acabado claro y duro se formará. La superficie puede ser pintada o dejarse como es después de secarse. No se almacene a temperaturas por debajo de 32°F.
