

HOUSEKEEPING

2090 RESCUE Foaming Soy/d-Limonene Degreaser is a great all-purpose cleaner, stronger than most, which attacks various soils on multiple surfaces. Perfect to remove light grease, ink, and soap scum.

HVAC

Clear summer's odor-causing accumulations of mildew, fungi, bacteria, algae and slime in drain pans with **6694 SANI-PAN STRIPS** time-release pan strips.

FOODSERVICE

3610 PREDATOR RTU Food Contact Surface Sanitizer is a no-rinse sanitizer for use in food contact applications such as food processing, dairy equipment, food utensils, and more.

INDUSTRIAL

5960 REVIVE Rust Converter treats rusted surfaces, converting the rust to an inert black polymer-based coating, thus preventing future rust from forming. Can be left unpainted or painted for appearance.

AUTOMOTIVE

3295 RE-FRESH Auto Air Conditioning Freshener removes foul odors from automotive air conditioning systems by killing odor-producing organisms. Keeps interiors smelling fresh.

Back to School!

Before calling on your school customers, **download our school maintenance brochure**, providing guidance on a total of 33 products for use in school restrooms, cafeterias, playgrounds and classrooms.

Bus Barns / Fleet Management

Fall's "Call Down the Hall" Six-Pack

Back-to-school time is the perfect opportunity to ask for an introduction to the bus barn/fleet maintenance department when calling on your current contact in facility maintenance or environmental services. We call it our "Call Down The Hall" program; you might call it increasing sales with existing customers.

Here's our suggested "six-pack" of specialty chemicals for bus barns / fleet maintenance:

Lubricating Parts, Door Hinges

5340 MR. MECHANIC Light-Duty Lubricant is an essential product in any bus barn or garage, as it is used for a number of needs including lubricating and preventing corrosion of parts such as nuts, bolts, and door hinges. It loosens corrosion "frozen" parts and can be used on either wet or dry surfaces. Its aerosol packaging provides convenient use on small parts and for spot applications.

Removing Grease/Oil

8240 THUNDER Organic Engine Degreaser is a biodegradable and VOC-compliant degreaser for engines and motors, as well as other surfaces, to remove oil, grease, tar and asphalt. It is an ideal product to clean gasoline and diesel engines, rims, garage tools, concrete service floors, and brick walkways.

Loosening Corroded, Frozen Parts

Stubborn rusted parts are no match for **5970 CHILL OUT Penetrating Oil**. The formulation combines rapid freezing (to shrink and create openings) with penetrating oil (which seeps into those openings) to loosen parts frozen by corrosion. After releasing the parts, the non-chlorinated formula protects against renewed corrosion.

Wheel Bearings and Chassis

Protect bus wheel bearings and chassis with **L1020 MOLY TUFF Multi-Purpose Grease**, formulated with a high viscosity base and a calcium sulfonate thickener. It is classified by the National Lubricating Grease Institute (NLGI) as GC (good for wheel bearings) and LB (chassis lubrication). It also meets Caterpillar CAT 5% moly requirements and meets/exceeds the testing requirements of ASTM D 4950.

TECH CORNER

How Enzymes Work

Enzymes are proteins that speed up chemical reactions in the cell. One area of the enzyme has a shape that fits with specific substrate molecules and binds to one or more specific molecules called reactants or substrates.

Binding occurs at the active site, forming an enzyme-substrate complex. The interaction then weakens some of the chemical bonds in the substrates. This leads to the **formation of a different molecule, which is then released from the active site**. The enzyme assumes its original shape and is free to work again.

Enzymes produced by bacteria work extremely well in controlling odors, particularly malodors created by organic waste, grease, and food by-products. The **enzymes attract organic material, interact with it, and break it down into water soluble nutrients**.

The bacteria in the formulation then digest the released nutrients. As the bacteria feed on the by-product of the enzyme reaction, they multiply and grow, thus continuing the process.

When comparing enzyme treatments, you'll find a difference in our line of EARTH SCENTS SUPER BUGZ Enzyme Treatment for Organic Waste. We add fresh scents in the formulations.

As the bacteria-producing enzymes are addressing the source of the malodor, the fragrance continues to maintain a fresh scent.

EARTH SCENTS is perfect for addressing odors, such as those in restaurant kitchen grease traps, kennels, RV holding tanks and porta-toilets. It can also be used on carpeting, upholstery, and other fabrics. The formulation is non-toxic, non-acid, non-alkaline, non-pathogenic, and non-polluting.

2840 EARTH SCENTS SUPER BUGZ Citrus
2850 EARTH SCENTS SUPER BUGZ Berry
2860 EARTH SCENTS SUPER BUGZ Cherry
2870 EARTH SCENTS SUPER BUGZ Eucalyptus
2920 EARTH SCENTS SUPER BUGZ Neutral

Quarts (12x1), Gallons (4x1), Pails (5 or 6 gallon), Drums (55 gallon)

Bus Barn / Garage (continued from page 1)

Vandalism Remover

Studies show removing graffiti within 24 hours reduces repeat tagging to almost zero. **2210 GRAFFITI GONE** is a USDA authorized gel formula which stays in place to clean vertical and irregular surfaces while removing ink, crayon, and lipstick markings. It is ideal for bus exteriors, windows, seats, and seat backs.

Exterior Wash

Remove road film and other tough soils from exterior surfaces with **8520 FLEETMASTER Heavy-Duty Wash**. It is biodegradable and works in both hot and cold water. It leaves surfaces clean as it rinses free with no residual film. Ideal for vehicle exteriors, wheels, rims and grills.

TESTIMONIAL

“ We just finished our first four gallons and we love the product.

No smell is a big selling point.

We are now advertising that we use the product on our website. ”

Ryan Varju, Chief Operating Officer
Sharing Connections, Downers Grove, IL

Sharing Connections uses Lights Out treatment on our upholstered furniture items. We use this product as part of our prevention, cleaning & inspection procedures.

Lights Out Info

Sharing Connections provides furniture and household items to low-income families, helping them transform a bare apartment or house into a home. Most of Sharing Connections families are coping with crises like domestic violence, returning or homeless veterans, job loss, or financial hardship. Sharing Connections is located in Downers Grove, IL and services DuPage and surrounding counties.

PRODUCT SPOTLIGHT

Start Your Engines ... Save Your Battery

There are over **480,000 school buses operating each school day** on behalf of over 13,588 school districts across America.

On any given cold, winter morning, chances are there are thousands of school buses across the country having **difficulty starting their engines**. The same holds true for bus barns servicing public transportation. That's why bus maintenance departments stock a supply of starting fluid to get these buses back into action.

8260 VROOM Starting Fluid is designed to aid gasoline and diesel engines with quick and easy starting power in cold, wet or freezing weather. It prevents excessive battery drain and, after use, acts as a corrosion inhibitor and upper cylinder lubricant.

8260 VROOM Starting Fluid - 12-16 oz. aerosol cans

PREPARE FOR WINTER

Liabilities for Slipping on Ice/Snow

Are property owners liable for individuals who "slip and fall" due to ice or snow? It depends on the situation and the prevailing state law.

Generally speaking, **under Premises Liability Law, property owners have an obligation** to keep sidewalks, walkways, driveways, parking lots, stairs, and other common areas clear of ice and snow.

Consider this scenario. It snows overnight and ice accumulates on the entrance to a building. Someone arrives to work at 8 a.m., slips and falls.

The courts would most probably consider this negligence as clearing a safe path is not an "unreasonable burden" on a facility manager. It is his job to maintain the facility for workers arriving in the morning.

However, if someone arrives at work at 3 a.m., the courts might view the liability differently. It might be considered an "unreasonable burden" for the facility manager to work through the night when regular working hours begin at 7 or 8 a.m.

No matter when you expect a storm, **6010 LIQUEFIRE Anti-Icing Agent makes post-storm clean-up easier**. Apply it before the storm to prevent the bonding of snow and ice to surfaces, including metal stairs, loading docks, concrete, sidewalks, parking lots and decorative brick walkways. **It is effective on surfaces where pellets aren't practical, such as grated iron steps and catwalks.**

6010 LIQUEFIRE Anti-Icing Agent - Gallon Pump Sprayers (4x1), Gallons (4x1), 2.5 Gallons (2x1), Pails (5 gallon), Drums (55 gallon).

EASY BOIL-OUT

Regular boil-outs keep food tasting fresher and prolong the life of a deep fryer. **Most deep fryer manufacturers recommend a boil-out cleaning every three to six months.** However, many restaurants will stretch this time frame, as deep cleaning of the fryer can be a messy job.

Not anymore! 40130 FRYER PUCK Boil-Out Deep Fryer Cleaner Tablets makes this job easy. It does all the work with **low foaming action**.

Just drain the spent oil, fill the fryer pot with water and add Fryer Puck tablets. Bring the water to a boil and continue boiling for at least 15 minutes. Drain the water, rinse with a vinegar/water solution, then wipe dry.

Fryer Puck can be used on gas fryers, deep fryers, French fryers, electric fryers, fish fryers, pressure cookers, tortilla chip fryers, and more.

40130 FRYER PUCK Boil-Out Deep Fryer Cleaner Tablets - 4 oz. tablets in packs of 30 or 40. (Also available in liquid.)

PROMOTIONS

6010 LIQUEFIRE Anti-Icing Agent

- Prevents bonding of snow and ice to:
 - Metal surfaces
 - Cement, Pavement
 - Brickwork
- Use on: Walkways, Catwalks, Loading Docks, Metal Stairs.

8000 DE-ICE Frost & Ice Remover

- Melts ice, frost and snow from windshields, windows, door locks, trunk locks
- Prevents locks from freezing
- Ideal for: Bus Barns, Police Patrol Cars, Rental Car Companies, Gas Company Fleets, Waste Management Trucks, etc.

PRESEASON PROMOTION

Special Pricing on orders placed
through 9/30/15

6010 LIQUEFIRE Anti-Icing Agent

- 4x1 gallon: \$9.44/gal.
- 4x1 gallon pump sprayers: \$15.92/gal.
- 2 x 2.5 gallons: \$12.32/gal.
- 5 gallon pails: \$9.40/gal.
- 55 gallon drums: \$9.12/gal.

8000 - DE-ICE Frost & Ice Remover

- 12-16 oz. cans per case with net. wt. of 12 oz.: \$28.08/case
