

MARIJUANA REMEDIATION PROGRAM

Legal pot smoking has presented cleaning challenges beyond tough odor control.

QuestSpecialty has you covered with products to eradicate marijuana smoke residue trapped in fabrics, permeating HVAC systems, and sticking on walls, cabinets, countertops and other surfaces in addition to clearing the air.

ODOR ELIMINATION: AIR & FABRICS

It is common knowledge that marijuana smokers also like to burn incense and other items to mask the odor. The odor lingers in the air and permeates fabric and carpet fibers. These odor eliminators don't just cover up the malodors, they neutralize the source.

3040 PRODIGIOUS Citrus Total Release Malodor Neutralizer (Neutralizes Marijuana; Contain Odor Eliminating Quat) – Is particularly effective on odors left by marijuana, leaving a pleasant citrus scent. Non-staining, dry spray leaves no wet fallout. Meets all current VOC standards.

3640 OUT COLD Smoke & Odor Eliminator (Total Release) – Counteracts marijuana as well as tobacco, cigars, fire and other smoke odors. Freshens air and fabrics without the worry of wetness, staining or residue. Also available with traditional spray nozzle: 3641 OUT COLD Smoke & Odor Eliminator Dry Air Freshener.

TWO-WAY VALVE (FOGGER & MANUAL SPRAY) – Both products feature a two-way valve which can be locked down into an open position for complete discharge as a room fogger or lightly depressed for short bursts of spray. When used as fogger, treats up to 6,000 cubic feet of space.

WALLS / COUNTERTOPS / SURFACES

Just as tobacco smoke leaves residue on surfaces, so does marijuana smoke. A simple wipe down of surfaces with a cleaner/degreaser should be adequate for short-term exposure to pot smoke. However, sometimes a more intense cleaning is necessary.

2090 RESCUE Foaming Soy/d-Limonene Degreaser – This foaming aerosol degreaser is a natural soy and d-limonene based formula which dissolves grease, oils and grime. It can be used to remove residue on specific areas such as exhaust fan blades, ceramic tile and finished woods.

2640 ZIP Citrus Cleaner & Degreaser – This water-based, concentrated liquid cleaner contains d-limonene to quickly clean walls, floors, vinyl, metal and carpets. It is particularly effective in removing residue similar to that left behind by marijuana such as soot, grease, and oil.

2130 SHEEN Glass Cleaner – Remove smoke residue from windows, mirrors, LED flat panel monitors and glass tabletops with this foaming, water-based, no abrasive cleaner. It doesn't leave any streaks and the non-ammoniated, non-static formula helps keep surfaces clean longer.

FABRICS, CURTAINS, UPHOLSTERY

Cannabis molecules get trapped in fabric fibers and will continue to be a source of odor if not addressed. Using an active bacteria product that will penetrate non-porous surfaces will biologically destroy odors by digesting the odor-causing source.

2290 BREAKDOWN Active Bacteria Odor Eliminator – This aerosol is specifically designed for easy application on textiles and fabrics such as carpets, drapes and upholstery to eliminate odors which are organic in nature.

It contains live bacteria which biologically digest odor-causing material and leaves behind a fresh, spring mist fragrance.

HVAC SYSTEMS

The residue from marijuana smoke can cycle through the HVAC the system if it was running during active smoking. To avoid the contaminants from recirculating, change the air filters and consider cleaning the evaporator/condenser coils and fins.

5390 SIDEWINDER Evaporator/Condenser Coil & Fin Cleaner – Clean any residue from air conditioners and central cooling systems with this fast acting, penetrating foam. No rinsing required! Dirt, lint and residue are washed away with condensation, leaving the unit cleaned and deodorized.
