## Battery Protectant

CLINCH is a light misting, clean, purple coating designed to prevent rust, corrosion and battery failure. Provides a long-term protection when applied to battery terminals, cable ends, wires, bolts, brackets, clamps and other metal components. One application is effective for up to 6 months. Proper use keeps batteries clean, prolongs life and helps prevent terminal contact failures. Every new battery installation and service should be completed with an application of CLINCH. Also great for rust prevention on a variety of other metal surfaces. The distinctive color shows where protection is working. Use on all batteries whether in or out of storage.

❖ **822000001-20AR Clinch**

12–20 oz. cans/case, 13 oz. net wt.

### For Use On:

*Battery Terminals, Cable Ends, Wires, Bolts, Brackets,  
Clamps and Other Metal Components*

### Features and Benefits:

*Leaves a Visible Protective Coating  
Protects Batteries, Terminals, Cable Ends, Wires, Bolts, Brackets & Clamps  
Prolongs Life of Battery & Related Components  
Helps Eliminate Battery Failure  
Use on Many Other Metal Surfaces to Prevent Rust and Corrosion.*

**FIRST:** Clean & Remove Buildup  
on the Battery with  
QuestSpecialty's DETECT.

**THEN:** Use CLINCH to Protect &  
Prevent Future Corrosion.
