PRODUCT SPOTLIGHT

**8170 SMOOTH RIDE
RUBBERIZED UNDERCOATING**

Seal out moisture and salt to prevent rust and corrosion without the mess or odor of asphalt-based products.

This fast drying formulation sprays on and quickly dries to provide durable surface protection.

It creates a flexible, smooth, uniform layer that won't crack, chip, flake or peel off.

Works great for undercarriages, hoods, wheel wells, rocker panels, and agricultural and industrial equipment. Can also seal flashings and gutters, fill cracks in asphalt and patch roofs and planters.

KEEPING REEFERS COOL & FOOD SAFE

This summer, as you enjoy your chilled beverage, steak on the grill, or scoop of ice cream, you can thank the road haulers who operate refrigerated trailers — known as reefers or transport refrigeration units (TRUs) — for keeping food and beverages at the proper temperature during transit. Just as important are the maintenance teams that keep these units running efficiently, including the critical task of regularly cleaning condenser coils.

TRU coils should be inspected every three to four weeks for debris, dust, insects, and physical damage. **Deep cleaning is recommended every three to six months**, or more frequently for units operating in dusty, agricultural, or coastal environments.

For best results, use a non-acidic coil cleaner sprayed directly onto the fins. Check out these products that are ideal for cleaning TRU coils:

5470 PYTHON EZ A/C CARE

EVAPORATOR COIL CLEANER & DISINFECTANT

- One-step cleaning and disinfecting
- Thick foaming action

5390 SIDEWINDER

FOAMING COOLING COIL CLEANER

- Creates its own condensation
- High power spray tip
- No rinsing required

SUMMER FLEET WASH

It is estimated there are approximately 14 – 15 million fleet vehicles on the road in the US.

Summer can take its toll on these commercial, government and rental vehicles with increased exposure to dust and road grime, UV exposure and increased mileage.

For the nearly 2.5 million rental cars, there is typically little turn-around time so cleaning efficiency is paramount.

A majority of fleet departments rely on pressure washers for cleaning vehicles.

Pressure washers avoid the micro-scratches created by nylon brushes and allows for targeted cleaning underneath bumpers and rocker panels.

8520 FLEETMASTER Heavy Duty Car & Truck Wash

- Made for use in pressure washers
- Removes road film and other soils that have bonded to the surface
- Rinses free with no residual film

Wax acts as a sacrificial layer against environmental hazards like bird droppings, tree sap, and acid rain.

It also acts as "sunscreen," preventing the sun's UV rays from causing oxidation, fading, or discoloration.

8100 COMMAND Auto Polish w/ Carnauba Wax and PTFE

- Carnauba wax for deep, warm, highly reflective shine
- PTFE extends life of the protection
- No streaking or smearing

WATCH THOSE PIVOT POINTS!

Proper lubrication of dock and garage door pivot points is essential to prevent premature wear and failure of these critical components. To ensure smooth and reliable door operation, lubrication should be performed approximately every six months as part of a routine maintenance program.

KEY PIVOT POINTS:

- | | |
|--------------------------|-----------------------|
| > HINGES | > TOP PULLEY CABLE |
| > ROLLER PINS & BEARINGS | > BOTTOM PULLEY CABLE |
| > SPRINGS | > RAIL ARM |
| > PULLEYS | > RAIL |

Download our newest Garage Door Maintenance product guide with recommended lubricants for all pivot points as well as suggestions for other areas of maintenance including tracks, rubber bottom seals, chain drives, overhead motors, rusted areas and panel surfaces.

NOT LEAVING YOU HIGH AND DRY ...

The industry is saying goodbye to perchloroethylene (PCE), but thanks to our expert chemists, we offer products to replace those former PCE-containing items. However, not all situations are the same, so we suggest you might want to consult with your QuestSpecialty rep for specific applications:

| QS Item Number | QS Item Name | Description | Replacement Product |
|----------------|---------------|----------------------------------------|----------------------------------------------------------------------------|
| 5090 / 5500 | PIERCE | 4-in-1 Lubricant-Penetrant | 5330 GENESIS |
| 5120 / 5130 | QUIKLEEN II | Parts Cleaner | 5010 HD DEGREASER |
| 5160 / 5170 | ELECTRO-CLEAN | Energized Electrical Equipment Cleaner | 5010 HD DEGREASER or 5240 UPPER CUT or 5250 LEFT HOOK |
| 5180 | KICK OFF | Safety Solvent | 5010 HD DEGREASER |
| 5300 | LOOSE SCREW | 4-in-1 Lubricant-Penetrant | 5330 GENESIS or 5740 SLICK |
| 5360 | AQUA-LUB | Lubricant | 5330 GENESIS |
| 5370 | SILI-LUBE | Heavy Duty Silicone Spray | 5380 SLIDE OUT |
| 5720 | BODACIOUS | Aerosolized Grease | 5790 BIG RED |
| 6004 | PIERCE | Bulk Moisture Displacer & Lubricant | 6012 GENESIS |
| 6110 | QUIKLEEN II | Bulk Solvent Cleaner | 6006 UNPLUG or 6060 QUIK SOLV |
| 8070 | PAD KLEEN | Brake Cleaner | 8090 NO CHLOR or 8110 CLEAN BRAKE or 8180 BRAKE BLAST |
| 8075 | POWER TRIP | Degreaser & Cable Cleaner | 5010 HD DEGREASER |

RED and BOLD = Flammable

STOP THE SWEAT!

Summer is sweating season ... for pipes! Condensation develops on pipes when the air is warmer than what is running through them. It can occur on cold water pipes, refrigeration lines, condensers, air conditioning lines, metal gutters and water tanks.

Sweating pipes can be quite problematic:

- **SLIP & FALL HAZARDS** from water dripping on floors
- **WATER DAMAGE** to ceilings, walls and insulation
- **MOLD & MILDEW GROWTH** in damp areas
- **CORROSION & DETERIORATION** of pipes and nearby equipment

Stop the sweating! Spray pipes with **5920 MC FREE SURROUND Cold Pipe Insulation Spray** for a drip-free, sweat-free summer.

ICED CAPPUCCINO

Whether you are pouring an iced latte, frappe or any other specialty cold brew this summer, it is critical to **keep your coffee makers clean and free of mineral build-up and oil deposits so they don't affect the flavor of your beverage.**

COLD BREW

Rely on **3015 GROUNDS KEEPER Coffee Urn & Pot Cleaner**. It also works great for K-cup type brewers and espresso machines.

WHY YOUR “GO-TO” BED BUG SPRAY STOPPED WORKING ...

It's not your imagination—it's biology. Over time, bed bugs have built up genetic resistance to traditional chemical sprays, making them nearly impossible to eliminate with standard pesticides.

It's time to bypass their defenses. **4650 LIGHTS OUT Bed Bug Killer** uses a potent blend of natural oils to target pests physically, rather than purely chemically. By knocking down and suffocating even the most resistant “super-bugs,” it delivers the breakthrough you've been waiting for. It is also effective on cockroaches, fleas and ants.

BLING IT ZINC

This is the perfect time to protect shiny galvanized surfaces against the rigors of winter's rust and corrosion.

5710 BLING IT ZINC Shiny Galvanized Coating dries to a hard film that is 93% pure zinc and will not crack, peel or yellow even under extreme conditions. It dries to a flexible, paintable coating and meets ASTM A780 & D520.

LANDSCAPING EQUIPMENT

BETTER PERFORMANCE! LONGER LIFE!

2155 BACK DOWN ALL SEASON SURFACE REPELLENT

Lawn Mowers: Spray on lawnmower underside, chute and deck to prevent grass clipping build-up.

Hedge Trimmers: Treat blades to keep them running smoothly.

Weed Wackers: Treat cover guards to prevent clipping build-up.

Shovels: Apply to surface to repel dirt and aid in clean-up.
