NEW ADHESIVE PRODUCT LINE!

GET STUCK ON US!

COMING SOON a new brand family:
SPRAY RITE by QuestSpecialty!

This new line includes spray and bulk adhesives for just about any adhesive you'll ever need:

- ▶ Carb Compliant Multi-Purpose Spray Adhesive
- ▶ Low VOC Multi-Purpose Spray Adhesive
- ▶ High Solids Foam & Fabric Spray Adhesive
- ▶ High solids, High Strength All-Purpose Spray Adhesive
- ▶ HAPS-Free Spray Adhesive

Come see us at ISSA to view them. Not attending? Call your rep for details and samples.

WINTER LUBRICANTS SYNTHETIC & SEMI-SYNTHETIC

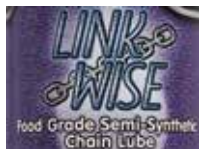

Standard aerosol lubricants can let you down in the winter as they freeze up, turn into a sticky gel that traps grit or wash away the second they hit melting snow.

Semi-synthetic and full-synthetic aerosol lubricants are essential during the winter for a number of reasons as they:

- ▶ Maintain their viscosity in sub-zero temperatures (low pour points), actively displace moisture, and prevent rust.
- ▶ Resist thickening in the cold, providing reliable protection for snowblowers, spreaders and plow linkages.
- ▶ Provide a durable, water-resistant barrier for garage doors, hinges, exposed mechanical drives, etc.
- ▶ Prevent moisture in pneumatic tools used in freezing conditions from stalling the tools

Here is a quick breakdown of lubrication options for winter maintenance:

Chain & Drive Systems

5270 LINK WISE Semi-Synthetic Chain Lube

Best For: Snowblower auger chains, exposed gears, drive systems, and heavy-duty linkages.

Moving Parts, Pivot Pts

L1080 EZ LUBE Food Grade White Grease

Best For: Cables, throttle linkages, bearing blocks, and hinge points.

Loosens Frozen Parts

5530 SUPER PEN Foaming Penetrant

Best For: Tools, pipe thread, dies, metal parts, pulleys, riggings and hoists.

BEYOND THE UNDERCARRIAGE

FACILITY USES FOR RUBBERIZED UNDERCOATING

Rubberized undercoating isn't just for automotive service centers or fleet maintenance garages. Consider the number of uses in facility maintenance where this tough, flexible protective coating is effective:

HVAC & Roof Equipment: Seals exterior ductwork, condensate drain pans, and rooftop AC units against weather and corrosion.

Gutters & Downspouts: Lines metal gutters, flashing, and drainage pipes to prevent leaks and rust.

Outdoor Enclosures: Protects electrical junction boxes, metal utility sheds, and equipment housings from rain and moisture.

Structural Framing & Posts: Coats the bases of metal fence posts, railings, and steel supports exposed to ground moisture or standing water.

Sound Dampening: Reduces vibration and noise on sheet metal panels, commercial hoppers, and chute linings.

Cleaning a Conveyor Oven

Cleaning a conveyor oven properly isn't complicated, but it does require the proper products, consistency and the right sequence so you don't damage components or leave grease behind.

Download this tip sheet on best practices and products which are ideal for basic cleaning and maintenance.

DOWNLOAD TIP SHEET ►

Early fall downpours and cooler temperatures create a perfect storm, pushing outdoor pests straight into indoor spaces.

Flooded Nests: Heavy rain saturates topsoil and floods burrows, forcing ground-dwelling bugs upward to seek dry shelter inside foundations.

Overwintering Instinct: Shorter autumn days signal pests to find warm, protected spots to hibernate. Heavy rain accelerates this rush indoors.

Common Invaders: Crawling pests (ants, roaches, centipedes, millipedes) and fall invaders (stink bugs, boxelder bugs, spiders) are the most common invaders.

Play Defense: With our insecticide options:

4250 VS 102 Roach & Ant Spray*

4290 CS 101 Roach & Ant Spray*

4370 FOGASOL II Room Fogger

4400 SHOOTER Water-Based Fogger

4410 SMOKE 'EM Dry Fog Insect Killer

4540 ERADICATOR Multi-Purpose Insect Spray*

4570 CLOBBER Lice, Mite & Bed Bug Multi-Purpose Spray

4640 DOUBLE TROUBLE RTU Insecticide*

4650 LIGHTS OUT Bed Bug Killer*

* PROVIDES RESIDUAL KILL

Non-PCE, Lower Cost Alternatives

As the industry transitions away from PCE-based products, replacement options often come down to cost versus non-flammability.

In addition to our full line of non-flammable solutions, QuestSpecialty is introducing two new flammable products that offer a lower-cost alternative.:

5930 PIERCE II FOUR-WAY PENETRATING LUBRICANT

- Blows out a foam cup bottom just like original PIERCE
- Leaves a protective film to help prevent rust and corrosion
- Dielectric strength of 6,000 volts

8185 POWER TRIP II HEAVY-DUTY CLEANING AGENT

- Ultra-fast dry time
- No residue formula
- No chlorinated solvents
- Safe for use on painted and non-painted surfaces

bundle with your ice melt

When you stock up on ice melt, don't forget other winter prep products:

PETS, PROFITS and BOV

The U.S. topical pet care and grooming market is valued at \$865 million and projected to reach \$1.3 billion by 2032.

Not surprising as approximately 70% of all US households own a dog or cat. Additionally, there are roughly 200,000 pet grooming and boarding businesses, 35,000 veterinary practices and 4,000 animal shelters.

Want to reach this market with your own branded formulation? We can deliver as we not only have the chemist experience to formulate, but have Bag-on-Valve (BOV) technology for filling, which is becoming the gold standard for medicated sprays, flea and tick treatments, and coat conditioners.

BOV offers distinct performance advantages:

- No Harsh Chemical Propellants: Delivers pure formulation safety.
- Continuous 360° Spraying: Applies evenly at any angle—even upside down.
- Whisper-Quiet Application: Eliminates the loud hiss of traditional aerosols, keeping anxious pets calm.

**BUT WAIT..
there are more
opportunities
for BOV**

Ready for Green Wednesday?

"Green Wednesday" is the day before Thanksgiving ... a day cannabis suppliers see a surge in sales.

Dispensaries now offer discounts and doorbusters for customers stocking up on flower, edibles, and vapes before the holidays.

With increased cannabis use, there will be an increased need for odor control, particularly in hotels and B&Bs.

Make sure these establishments are stocked with **3040 PRODIGIOUS CITRUS Total Release Malodor Neutralizer**, formulated to neutralize all types of malodors, particularly those left by marijuana.

GO STRAIGHT TO SEEING OUR 38 DIFFERENT AUTO PRODUCTS FOR APPEARANCE AND PERFORMANCE.

Brake Cleaners | Exterior Coatings
Interior Coatings | Interior Cleaners | Tire Shine
Exterior Wash | Odor Control | Degreasers
A/C Freshener | Rubberized Undercoating
Battery Protectant | Carb/Choke Cleaner ... and more
