6 Exciting New Changes at QuestSpecialty

#1

A **Bag-on-Valve (BOV)** is a packaging technology where a product is contained within a flexible bag inside a pressurized can, separated from the propellant. This system allows for controlled and hygienic dispensing of liquids, viscous products, or even some solid formulations. BOV offers advantages like product preservation, full product extraction, and environmentally friendly propellants.

Key Features of Bag-On-Valve (BOV) technology

- Product integrity-product is separated from propellant protecting it from oxidation
- Full Product Extraction-BOV dispenses up to 99% of the product
- Environmentally Friendly-Propellants are compressed air or nitrogen, no VOC-containing propellants
- 360° Actuation-Can be used at any angle and has a continuous spray
- Versatility-Wide range of product categories to include skincare, food products, pharmaceuticals and industrial

#2 REINTRODUCING THE FUSION FAMILY OF ADHESIVES

Planned for introduction in Q1 2026, we will be previewing the product line at ISSA. We plan on rolling out a mist, web, hi-temp trim and foam and fabric adhesive that will be equal to or better than the leading adhesive manufacturers. These products can be used for general purpose bonding of solid and semi-solid substrates. The Fusion Family of Adhesives will be available under the QuestSpecialty brand and for private label.

FUSION SERIES

3 Different Adhesive Options for a Variety of Applications!

Excellent for Porous, Uneven or Smooth Surfaces

Flexible, Transparent, Non-Staining Adhesives Set Up Quickly

#3 COME SEE OUR SURE SHOT COLLECTION OF EXTENDED SPRAY PRODUCTS

Do you have parts, equipment or even surfaces in your building that you have neglected or overlooked to clean because they are hard to reach, and employees don't want to use *ladders? Our **Sure Shot** line of extended spray products puts the "ease" back in easy. Our products will spray up to 15 feet. The more you use them the more applications you will find. Have an idea for an extended spray product? Come visit us in the booth to discuss.

**Falls from ladders cost businesses in the U.S. an estimated $24 billion annually, encompassing costs from work loss, medical treatment, legal expenses, and pain and suffering. These injuries are a common and serious problem, leading to hundreds of deaths and over 500,000 emergency-treated injuries each year across the country.*

#4 CONFUSED ABOUT ALL OF THE MANDATED EPA CHANGES?

The EPA has been hard at work eliminating a lot of products that have been in customer product portfolios for years. As a result, many businesses are not sure how to move forward with replacement products. QuestSpecialty does and we invite you to our booth to listen to your questions and we will help guide you through this period of change. We will have some reformulated industrial products for you to review.

#5 NEW PRODUCT IDEAS

ISSA
BOOTH #1641
November 11-13, 2025

The lab has been hard at work developing and delivering a host of new products. Below is a highlight of the new products that will be on display at ISSA.

AUTOMOTIVE
- Interior detail sprays
- Exterior detail sprays
- Black rubberized undercoating
- Bio-based carpet spotters
- Water-based total release odor eliminators

SANITARY MAINTENACE
- **Citrus Grove**-Orange metered air freshener
- **Staf**-Hospital spray disinfectant and **air sanitizer**

INDUSTRIAL
Degreasers
- **Remove**-Heavy duty citrus degreaser with terpenes
- **Lemonator**-Heavy duty degreaser with lemon terpenes.

Lubricants
- **McFree Dry Moly**-MCE free dry film lubricant
- **Moli-Dri**-Dry moly lubricant

INDUSTRIAL *(CONT.)*
Penetrants
- **Breach**-super penetrant with high capillary action
- **Super Pen**-foaming penetrant, moly fortified for extreme conditions
- **Cut N' Tap**-foaming penetrant and cutting oil
- **Liberate**-Clinging gray penetrant with moly & PTFE for extreme conditions

Metal Treatment
- **Avert**-corrosion inhibitor for long term rust prevention
- **Bling It Zinc**-Shiny galvanized coating. Meets ASTM A780 and D52

Specialty
- **ARC**-water-based anti-spatter, silicone free
- **McFree Surround**-Cold pipe insulation spray MCE free

#6 COME MEET THE NEW QUESTSPECIALTY LEADERSHIP TEAM

Michael Koma
Chief Executive Officer
